About Me

I am a motivated and ambitious full-stack developer with a strong educational background in Robotics and Mechatronics from TATU. Throughout my studies, I have gained a solid foundation in programming languages such as Node.js, TypeScript, and GraphQL. I am also proficient in front-end development using React.js.

Although I may be new to the industry, my passion for full-stack development drives me to continuously learn and improve my skills. I have experience working with Express.js, Mongoose, and Sequelize.js frameworks.

I am eager to apply my knowledge and contribute to innovative projects that require both back-end and front-end expertise. With my attention to detail and problem-solving abilities, I aim to deliver high-quality solutions that meet clients' needs.

If you are looking for a dedicated full-stack developer who is ready to take on new challenges, please reach out. I look forward to discussing how we can collaborate on exciting projects together.
